

Thank you for downloading this Free Vector Burger Logo Design! We hope you enjoy the product.

A few things to help you get started with this pack:

1. There is an editable EPS file, which can be opened in Adobe Illustrator for editing.
2. You can change the colours of the element and the text, add/remove elements from the logo design and change the font to suit your needs. The vector illustration of the burger has a white stroke of 1.5 pt. You can change the colour of the stroke to match the color of your background.
3. The font used in this logo design is called Filson Soft. If you have Adobe Typekit, you can download the font straight from there. If you don't have it, and want to use the same, do go ahead and purchase it. (It is rather expensive, so if you can buy it, do so, otherwise you can find fonts similar to that here: <https://www.typewolf.com/site-of-the-day/fonts/filson> and <http://www.identifont.com/similar?3HBN> ). Choose the one that suits you.
4. There is also a viewable PNG file. You can make few edits to that using Adobe Photoshop.

Cheers!
